## AS-5251 Bituminous Compound

Alseal Bituminous Compound is specially formulated for the treatment of cracks and holes in concrete, bricks, roofing, asbestos sheets, etc.

### Applications:

Ideal for sealing and protecting nailing area on metal sheet and roofing. Also used for sealing cracks on concrete, mortar, ceramic tile and roofing sheets.

### Instructions:

1. Clean cracks, nail heads or holes and leave them to dry.
2. Fill cracks with sealing compound using trowel or putty knife.
3. For leaks around roof nails, apply compound round the whole with stiff brush, cover the hole with cloth, and paint over with compound.

**Available colour:** Black paste

### Features:

- ✓ Bituminous-based
- ✓ Asbestos-free
- ✓ Sealing gaps and joints against water
