## AS-8118 Sprayable LP Contact Adhesive

ALSEAL AS-8118 Sprayable LP Contact Adhesive is a premium quality solvent-based synthetic rubber adhesive formulated for high heat resistance (up to 100 °C) applications. It bonds a variety of common sheet materials. Its low viscosity allows easy spraying. It has long tack time and offers superior bonding strength.

### Applications:

Ideal for bonding of leather, fabric, laminate, rubber, cork, fiberglass, polyurethane foam, EVA to wood, metal or concrete where high heat resistance is required.

**Available colour:** Light brown liquid

### Features:

- ✓ High heat resistance
- ✓ Excellent adhesion
- ✓ Bonds most materials
- ✓ Easy to spray
