AS-2507 Epoxy Moisture Barrier

Epoxy Moisture Barrier is a solvent-free, two-component epoxy moisture barrier that is specially formulated to form a protective coating against both moisture and vapor on flooring foundations. It has excellent adhesion and prepares the surface for subsequent flooring adhesives.

Applications:

Suitable as a moisture barrier layer for various applications such as timber, vinyl flooring, concrete, fibre cement, stone, masonry, structural plywood, brick, etc. It also promotes adhesion for porous substrates such as concrete.

Available colour: Grey (after mix)

Features:

- ✓ 1:1 mixing ratio
- ✓ Excellent water vapor retardant (ASTM E96/E96M-16)
- ✓ Solvent-free
- ✓ Low odour
- ✓ Non-flammable
- ✓ Bonds to most substrates
