

Advanced MS Polymer

Seam Sealant

Features:

- High Strength & Elastic
- Paintable & Fast Drying
- Good UV Resistance
- No Shrinkage
- Primerless Bonding to Most Substrates

Description:

A one-component, high-performance sealant formulated based on advanced MS Polymer technology. This sealant is free of solvent, silicone and isocyanate. It feature fast-drying speed, excellent UV, weather and temperature resistances. The adhesion on various substrates is excellent even without primer, and the sealant is paintable with most types of common industrial paints.

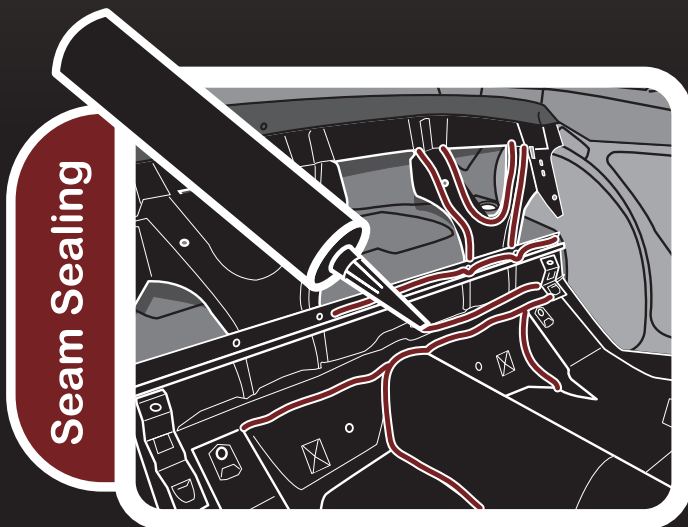

Applications:

Ideal for making permanent elastic seals of high bonding strength, especially interior and exterior auto body seams and joints. It is also suitable for elastic bonding in construction, marine, automotive and industrial applications that require a high-strength performance.

Product Code	AS-4010	AS 3-353
Product Name	Seam Sealant	Seam Sealer
Content	290ml (cartridge)	180ml (tube boxed)
Available Colors	White & Beige	White
Packing	20 cartridges / carton	60 tube boxed / carton
